

## Potential LEED points from Johnsonite solutions

Our approach to the environment is called Balanced Choice. It's a practice that begins with the conviction that everything is interconnected and that every person, project and environment is different and requires different choices. Every decision has an impact down the road - on our customers, their environment and their budget.

Johnsonite is committed to creating systems with long functional lives to minimize resources and energy consumed by alternate materials. We are making the necessary efforts regarding sustainable resilient flooring solutions and compliance with the US Green Building Council's LEED rating program. The following contains all Johnsonite solutions and the ways in which they contribute toward LEED points. The charts have conveniently been separated by New Construction, Commercial Interiors, Schools and Existing Buildings.
