

Environmental Fact Sheet

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that help people work, play, shop, heal and learn better.

We use more recycled content at the start and recycle more product at the end.

Safety Products

Safety products are part of a system that balances impact across people, the environment and the bottom line. They're part of our goal to develop solutions that use better materials, practice resource stewardship, and create people-friendly spaces while maximizing reused and recycled content. Johnsonite's Safety products include Granit™ Multisafe and Granit™ Safe-T.

BETTER RAW MATERIALS

Johnsonite's Safety products are manufactured using the most environmentally responsible materials possible while assuring consistency in quality and performance. We use local suppliers as often as we can, to reduce the environmental impact from transportation.

- Based on up to 59% natural raw materials, such as mineral fillers

RESOURCE STEWARDSHIP

Safety products are produced in Ronneby, Sweden. The factory applies an environmental management system (ISO 14001). Over the last five years, our Ronneby factory has made numerous improvements.

- 54% reduction in waste levels
- 60% reduction in VOC emissions to the air
- 26% increase in recycling since 2003

The factory manages water consumption via a closed loop, and 53% of the energy used comes from renewable sources, such as electricity from wind and hydropower and heat from biofuels.

PEOPLE-FRIENDLY SPACES

One of our core beliefs is that people are happiest when they are offered choices that help them balance their needs and stay true to their values. Johnsonite's Safety products deliver valuable health, hygiene and welfare benefits:

- No need for polish or wax, for ever, reducing the strain on cleaning staff and minimizing the need for water, detergent and energy for cleaning and maintenance.
- FloorScore and CHPS certified for good indoor air quality.
- Up to 30% savings on cleaning and maintenance compared to the market's best **Life Cycle Cost** and a measurably enhanced ROI.
- Solutions for special applications, e.g. conductive, antistatic or acoustic requirements.

REUSE AND RECYCLE

Tarkett, parent company of Johnsonite, was one of the first flooring companies to recycle post-production waste, and has also developed a system for collecting post-installation waste. In 2008, 411 tons of material were collected all over Europe and returned to Ronneby. This corresponds to approximately 1.5 million square feet. Safety products contain:

- 25% pre-consumer recycled material
- 0.5% post-consumer recycled material.
- All samples can be reclaimed and repurposed as part of our RESTART™ reclamation program.

ISO 14001 certificate no. 2000-SKM-AQ-886, ISO 9001 certificate no. 2000-SKM-AQ-255
