We're green with every step!
CARPET CUSHION

Leggett & Platt
INCORPORATED

Leggett & Platt Carpet Cushion, the leading manufacturer of cushioning products, services the carpet and flooring industries. We have been committed to minimizing our impact on the environment - past, present and the future. We are always seeking more environmentally sound manufacturing processes for ensuring success through innovation and technology.

Our company has always prided itself on the quality of our products as well as our service. Not only do we focus on providing products of consistent quality, we are also dedicated to doing our part to ensure a cleaner environment.

Our products are tested in accordance to the Carpet & Rug Institute's Good Indoor Air Quality program, referred to as Green Label. This voluntary program certifies the carpet cushion as a low off-gassing product. Leggett & Platt cushion products proudly carry this certificate. Many of our products are composed of recycled and recyclable content. Today we offer many other green characteristics for the different product types which contribute to a cleaner, safer environment. We are committed to doing our part in the green community and are proud members of the United States Green Building Council.

Leggett & Platt Carpet Cushion, a true partner for life, not only for our excellent products, but because we care about the generations to come.

CARPET CUSHION

GREEN ATTRIBUTE	DESCRIPTION	LEED® 2009 NC
Recyclable	At end of useful life, can be 100% recycled. National incentivised collection network.	MR 2.0: Points available Product can be recycled.
Ozone Friendly	Exceeds CRI Green Label test program.	IEQ 4.3: Points available Product is Green Label certified.
Packaging	Packaging is recyclable.	n/a
Energy Initiatives	Improved lighting systems in manufacturing reduce electrical demand. Provides thermal insulation properties.	n/a
Regional Materials	1 production facility: Ontario, CA	MR 5.0: Points available Where used within 500 miles of mfg.

LEED® points must be considered along with the other building components and must be determined by the specifier/architect or LEED® accredited representative.

100% RECYCLED Rebond

CARPET CUSHION

GREEN ATTRIBUTE	DESCRIPTION	LEED® 2009 NC
Recyclable	At end of useful life, can be 100% recycled. National incentivised collection network.	MR 2.0: Points available Product can be recycled.
Recycled Content	Consists of 100% recycled materials. (post consumer / post industrial trim)	MR 4.0: Points available Product is made from 100% recycled material.
Ozone Friendly	Exceeds CRI Green Label test program.	IEQ 4.3: Points available Product is Green Label certified.
Renewable Technology	Petroleum based Polyol replaced with BioBasic™ renewable seed oil. Very little non-recyclable waste from manufacturing bonded cushion.	n/a
Packaging	Wrapping Film: 80/20 mix of post industrial poly. Packaging is recyclable.	n/a
Energy Initiatives	Improved lighting systems in manufacturing reduce electrical demand. Compressed products in most markets to reduce fuel demands. Provides thermal insulation properties.	n/a
Regional Materials	9 production facilities nationwide: Berwick, PA; Edison, NJ; Statesville, NC; Houston, MS; Fort Worth, TX; Ontario, CA; Tracy, CA; Aurora, IL; Chicago, IL	MR 5.0: Points available Where used within 500 miles of mfg.

LEED® points must be considered along with the other building components and must be determined by the specifier/architect or LEED® accredited representative.
